Farmers National Bank Proposes New Stock Sale

Appomattox - The Board of Directors of The Farmers National Bank has called for a special meeting of shareholders at the bank on Tuesday, August 7, 1973, at 7:00 p.m.

The shareholders will be asked to take action on a proposal to change the par value of the present stock and to increase capital funds of the bank by sale of new stock as recommended by the Board of Directors.

The board recommends: There be a two-for-one stock split reducing the par value from $10.00 per share to $5.00 per share for the 18,500 shares outstanding; that 12,333 shares of new stock be issued at $5.00 par value to be sold at a price of $30.00 per share.

A present shareholder's rights will amount to one-third of a share for each share held, after the two-for-one proposed stock split. The rights, if not exercised, will expire on August 31, 1973.

Larger Income For Families

July 14 - Residents of Appomattox County were in the marketplace in greater force in the past year, according to a report on local retail store activity, just released.

With most local families enjoying bigger incomes than in the previous year, they were in a position to spend more and they did so.

They were far less cautious in that respect than they had been in 1971, when they kept their spending under tight control and put a record amount of money into savings.

The facts and figures, with a breakdown of their outlays for automobiles, food, clothing, furniture and other goods and services, are from a new consumer markets survey conducted by the Standard Rate and Data Service. It gives comparable data for every section of the country.

In Appomattox County, it is shown, stores selling food and automotive equipment captured a large part of the consumer dollar. Between the two of them, they attracted 71 percent of all local retail business.

The amount spent for food alone, in local supermarkets, bakeries, butcher shops, delicatessens and the like, totaled $1,748,000, compared with the prior year's $1,617,000.

These expenditures refer only the food that was bought for home consumption. They do not include the amount that was spent in restaurants, lunch rooms and other dining and drinking places.

The report shows that automobile dealers and those building motorcycles, boats, trailers and related equipment also had a good year, accounting for a total of $4,114,000, as against the previous year's $3,528,000.

Most other retail lines in the local area also turned in good figures for the period.

Department stores and variety shops dealing in general merchandise chalked up $1,061,000, as compared with their 1971 volume of $924,000.

Drug store sales amounted to $762,000 in the year. Their former total was $702,000.

Sales of furniture and other home furnishings came to $906,000, as against the previous total of $772,000.

Much of the increase in gross sales is attributed to the higher cost of goods and services.
